

Buyers : AI for your tender evaluations

The sovereign AI that analyses and objectively evaluates received bids without ever exposing your data.

75% Time saved

100% Requirements verified

0% Data outside France

1 - Validate your tender before publication

Identify inconsistencies between your documents and extract key information.

→ A solid tender from the very start

2 - Centralise and structure received bids

Organise into folders and generate clear summaries - to prepare a compliant analysis

→ Ready for a compliant, loss-free analysis

3 - Evaluate each candidate — objectively and with full traceability

Based on your evaluation grid and a detailed automatically generated requirements list, our AI assesses candidate compliance.

- Multi-level analysis: requirements, criteria, documents & overall offer
- Detailed scoring and evaluation
- Comparative table of all bids

→ Gain objectivity, time and traceability. Make the best choice. With confidence.

4 - Ask questions to our AI Assistant

Use our AI Assistant, which answers your questions interactively

→ Ideal for quick reviews, spot checks or any question along the way.

Your tenders. Your data. Your control.

SECURITY & CONFIDENTIALITY

Data Confidentiality

Your data is never used to train the AI and always stays local.

Secure Data in France - Sovereign Cloud

Your files are hosted on our private servers in France: security at every step.

Green AI

Optimised, low-consumption AI — no GPU overuse, no external API transfer.

On Premises 100% Intranet

For the most sensitive clients: installation on your own servers, fully intranet.

CONTROLLED COLLABORATION

- ✓ Create a team with your colleagues
- ✓ Assign requirements to team members
- ✓ Stay in control, track validations in real time
- ✓ Manage access rights to guarantee confidentiality even within your organisation

Pricing tailored to your needs

Transparent, custom pricing - simply based on the number of tenders.
Discovery phase of 1 to 3 months to test Specgen on your documents.
