Specgen

Specgen - AI for tenders

A secure, easy-to-use solution designed for public and private buyers.

75% time saved per tender

1 - Optimize your tenders from the start

Instantly identify inconsistencies across your tender documents

→ Correct and optimize your tender before publication to ensure clarity and compliance

2 - Centralize and structure received offers

Organize offers in folders
Generate clear summaries of offers

→ Prepare for accurate evaluation with zero information loss

3 - Evaluate compliance with precision

Automatic compliance anaylisis to all requirements/criteria.
Get a global score, a document-by-document rating, and requirement-level details

→ Gain objectivity, save time, and ensure full traceability

4 - Extract the answers to your questions

Upload your templates with technical, financial, or RSE questions
Our AI extracts relevant answers directly from submitted offers

→ Accelerate your reading and simplify the verification process

You can edit & validate all analyses with your team with our collaborative workspace

5 - Interact with your documents

Ask questions to our secure chatbot. It answers based on your uploaded documents and knows how to follow the conversation
→ Ideal for reviewing quickly, resolving doubts, or exploring content on the fly
